Protect your biz from cyber threats

Every day, countless companies are attacked by cyber-hackers or fall victim to viruses, malware, ransomware, or phishing attacks. This is evident in the latest headlines when we see that even large name corporations have been compromised and many times have lost sensitive customer information such as credit card or social security numbers. The mistake that many small businesses make is assuming that they are not included in this threat and that just because they are a small business, they will not be targeted. In reality, these businesses are just as much at risk as the larger ones. That is why all businesses, regardless of size, need to be prepared and take the steps necessary to continually strengthen their cyber-security.

Continue reading this Open for Business article written by our own Bryan Kuntz and Nate Abegglen for more information on cyber security awareness, prevention, maintenance and support!
